1 Introduction

Angkor Wheels Rental is the management system behind a motorbike rental business based in Siem Reap, Cambodia. It has two connected parts:

- A public website where customers browse the available motorbikes, check pricing, and submit a rental request online.
- An admin panel where staff manage the fleet, review and confirm bookings, track customers, record payments, and monitor the business.

This guide documents the admin panel in detail, since that is where staff spend most of their time, and also covers the customer-facing website so admins understand what customers see.

Who should use this guide

- Business owners and managers who need the full picture of what the system can do.
- Front-desk / rental staff who create walk-in bookings, confirm payments, and hand out motorbikes.
- Anyone new to the team who needs to learn the system quickly.

Main benefits

- One place to see every booking, whether it came from the website or a walk-in customer.
- Automatic conflict checking, so the same motorbike can never be double-booked for overlapping dates.
- A 50% deposit rule enforced consistently for every booking, online or in person.
- Support for Cambodia-specific payment methods — KHQR, ABA, ACLEDA, Wing, and card — alongside cash for walk-ins.
- Built-in reporting on revenue, bookings, fleet utilization, and customers.
- A bilingual public website (English and Khmer) so both local and international customers can book comfortably.

2 System Requirements

Angkor Wheels Rental is a web application — there is nothing to install. It runs in a standard internet browser on a computer, tablet, or phone.

Requirement	Details
Supported browsers	Google Chrome, Microsoft Edge, Mozilla Firefox, or Safari (recent versions of any of these).
Screen size	The admin panel is designed for a laptop or desktop screen (1280px wide or larger) for the most comfortable experience. It remains usable on a tablet.
Internet connection	A working internet connection is required at all times — the system stores all data on a central server, not on your device.
Account	An admin account (email + password) created by a Super Admin. See Section 13 for the roles available.

- i** The public booking website is fully responsive and works well on customers' phones, which is how most rental inquiries happen in practice.

3 Login

All staff access the system through the admin login page.

1. Open the admin login page in your browser.
2. Enter your email address.
3. Enter your password.
4. Click Log In.

The admin login screen

Forgot your password?

Click "Forgot password?" on the login screen and enter your email address. If an account exists for that address, a password reset link is sent to it, valid for one hour.

Incorrect login

If the email or password is wrong, the system shows an error message and does not log you in. Contact a Super Admin if you keep being rejected — they can check whether your account is still active from the Users page (Section 13).

4

Dashboard

The Dashboard is the first page you see after logging in. It gives a quick, at-a-glance summary of how the business is doing today.

The admin dashboard

What is on the dashboard

- A personalized greeting with today's date and two shortcut buttons: New Booking and Add Motorbike.
- Fleet Overview cards — Total Motorbikes, Available, Currently Rented, and In Maintenance.
- Bookings & Revenue cards — Pending Bookings, Today's Revenue, This Week, and This Month.

- A Revenue by Month chart and a Bookings by Month chart, both covering the last 12 months.
- A Booking Status Breakdown chart showing the proportion of bookings that are pending, confirmed, active, completed, or cancelled.
- A Top Performing Motorbikes list, ranked by revenue, with the two top spots marked with gold/silver rank badges.

Every number on the dashboard is live — it reflects the current state of the database, not a cached snapshot.

5 Navigation

The left-hand sidebar is how you move between every part of the admin panel. It is organized into three groups.

The motorbike list, with search, status filter, and quick actions

Fields on a motorbike

Field	Description	Required
Name	The display name shown to customers, e.g. "Honda Click".	Yes
Brand / Model	The manufacturer and model, e.g. Honda / Click 125i.	Yes
Engine CC	Engine size in cubic centimeters.	Yes
Transmission / Fuel Type	Automatic, Manual, or Semi-Automatic; Gasoline or Electric.	No (has a default)
Plate Province / Plate Code	The Cambodian province printed on the plate (selected from a list of all 25 provinces, or the national plate) and the plate code, e.g. ភ្នំពេញ 1AC-2345.	No

Field	Description	Required
Key Type	Normal Key or Smart Key.	No
Daily / Weekly / Monthly Price	Rental rates. Weekly and monthly rates are optional discounted tiers.	Daily price is required
Deposit / Delivery Fee	The refundable security deposit and any hotel-delivery fee.	No
Min / Max Rental Days	The shortest and longest booking length allowed for this bike (a half-day booking of 12 hours or less always bypasses this).	No
Status	Available, Rented, Maintenance, or Inactive.	Yes

Adding a motorbike

1. Click Add Motorbike from the Motorbikes list (or the dashboard shortcut).
2. Fill in the Basic Information, Rental Information, and Features sections.
3. Click Create Motorbike.
4. On the next screen, upload photos — the first photo, or the one marked as primary, is what customers see first.

*Editing an existing motorbike*

Deleting / deactivating a motorbike

Use the trash icon to permanently delete a motorbike, or the toggle icon to mark it Inactive without deleting it (useful for a bike that is temporarily out of service, e.g. sold or being repaired long-term — see also Section 9, Maintenance, for shorter repairs).

 Deleting a motorbike is permanent and requires the Admin or Super Admin role. Staff accounts cannot delete motorbikes or bookings.

Searching and filtering

Use the search box to find a motorbike by name, brand, model, or plate number/province, and the status dropdown to show only Available, Rented, Maintenance, or Inactive bikes.

7 Reservations & Bookings

Purpose: this is the heart of the system — every rental, whether submitted by a customer on the website or created by staff for a walk-in, is a booking.

The Reservations calendar

The Reservations page opens in Calendar view by default, with KPI cards at the top (Today's Reservations, Active Rentals, Returning Today, Available Motors, Upcoming This Week, Pending Approval, and Unpaid/Partial).

The reservations calendar, with a colored dot per booking status

Each day on the calendar shows how many bookings fall on it, with a colored dot for each status (pending, confirmed, active rental, returned, cancelled). Click any day to see the full list of bookings for that day.

Switch to Table view using the toggle in the top-right for a traditional sortable, filterable list instead of a calendar.

The screenshot shows the 'Admin / Reservations' page. The left sidebar contains navigation links for Admin, Dashboard, Rental Management (Motorbikes, Reservations, Bookings (List), Customers, Maintenance, Reports), and Website (Content & Policies, Banners, FAQ, Locations, Messages, Settings (Users, Audit Logs)). The main content area has a 'Reservations' header and a summary dashboard with six cards: Today's Reservations (0), Active Rentals (1), Returning Today (0), Available Motors (9), Upcoming This Week (1), and Pending Approval (2). Below these is a '+ New Reservation' button and a filter bar with search and dropdown options. The main table lists reservations with columns for ID, Customer, Motor, Pickup, Return, Total, Status, Payment, and Actions.

ID	Customer	Motor	Pickup	Return	Total	Status	Payment	Actions

The reservations table view

Creating a new booking (walk-in / staff-created)

1. Click New Booking from the Reservations page, the Bookings list, or the dashboard shortcut.
2. Choose the motorbike and the pickup/return date and time — the estimated total and required 50% deposit are calculated automatically.
3. Choose an existing customer by searching their name or phone, or switch to "New" and enter a new customer's details.
4. Set the Booking Status (Pending, Confirmed, Active, or Completed) and the payment details — Payment Status, Paid Amount, and Payment Method.
5. Click Create Booking.

The New Booking form

i Walk-in customers are usually recorded as Confirmed right away, since they are physically present. Bookings from the public website start as Pending until a staff member reviews and confirms them.

⚠ Any booking status other than Pending or Cancelled requires at least 50% of the total to be marked as paid. The form shows a warning and blocks saving if the amount is not enough.

The Bookings list

Bookings (List) shows every booking as a sortable table with search and status filtering.

A booking's detail page

Updating a booking's status

Use the Update Status panel on the right side of the booking detail page: choose the new status, optionally add a note, and click Update Status.

Update Status

1

PENDING

Note (optional)

2

Update Status

Choose the new status

Click to apply

Updating a booking's status

When a booking is marked Returned, the system automatically records the return time and suggests a late fee if it is configured (see Section 12, Settings) and the bike came back after its scheduled return time. The late fee and any deposit refund amount remain editable in the "Return & Deposit" section.

Deleting a booking

Open the booking and click Delete Booking at the bottom of the Adjust Booking form. A confirmation dialog appears before anything is removed.

The delete confirmation dialog

 Deleting a booking is permanent and requires the Admin or Super Admin role.

8

Customers

Purpose: every person who has ever booked a motorbike — through the website or as a walk-in — has a customer record, automatically created the first time they book (matched by phone number) and reused for every later booking.

The customer list

Customer information

Field	Description	Required
Full Name	The customer's name.	Yes
Phone	Used to match repeat customers automatically.	Yes
Email, Nationality, Telegram, WhatsApp	Optional contact details.	No
ID Type / ID or Passport Number	ID Card or Passport.	No
ID Document Photo	An uploaded photo of the ID/passport, if provided at booking time.	No

Opening a customer shows their profile plus their full booking history in one place.

The screenshot displays the 'Customer Profile' page in the Angkor Wheels Rental Admin interface. The left sidebar contains navigation links for 'Admin', 'Dashboard', 'RENTAL MANAGEMENT' (Motorbikes, Reservations, Bookings (List), Customers, Maintenance, Reports), 'WEBSITE' (Content & Policies, Banners, FAQ, Locations, Messages), and 'SETTINGS' (Users, Audit Logs). The main content area is titled 'Admin / Customer Profile' and 'Customer Profile'. It features a profile form on the left with fields for Full Name (Sok Dara (Demo Customer)), Phone (099 000 111), Email (demo.customer@example.com), Nationality, ID Type (dropdown), ID / Passport #, Notes, and a 'Blocked' checkbox. A 'Save Changes' button is at the bottom of the form. To the right of the form are three summary cards: 'Total Rentals' (1), 'Total Revenue' (\$23), and 'Active Rental' (Yes). Below these cards is a table showing the customer's booking history.

Booking #	Motorbike	Pickup	Return	Total	Status
SR-20260825-3484	Honda ADV	Aug 26, 2026	Aug 27, 2026	\$23.00	PENDING

A customer's profile and booking history

Customer details can be edited directly from their profile page. Staff, Admin, and Super Admin accounts can all edit customer information.

9 Maintenance

Purpose: track service history for each motorbike — oil changes, tires, brakes, engine work, battery, general service, and accident repairs.

The screenshot displays the 'Maintenance' section of the Angkor Wheels Rental Admin interface. On the left is a dark sidebar with navigation options. The main area features a 'Log Maintenance' form and a table for existing records.

Log Maintenance Form:

- Select motorbike ***: A dropdown menu.
- Oil change**: A dropdown menu.
- Date**: A date picker showing 08/25/2026.
- Description**: A text input field.
- Mileage**: A text input field with the value 0.
- Garage**: A text input field.
- Scheduled**: A dropdown menu.
- Log Record**: An orange button to submit the record.

Maintenance Records Table:

Motorbike	Type	Date	Cost	Status
No maintenance records yet				

The maintenance records list

Each maintenance record captures the motorbike, the type of work, a date, optional odometer reading, cost, garage name, and a status of Scheduled, In Progress, or Completed.

i Maintenance records are separate from a motorbike's overall Status field. Setting a motorbike's status to "Maintenance" hides it from customer bookings while it is being worked on; the Maintenance section keeps the detailed repair history regardless of that status.

10 Search and Filter

Search and filtering controls appear consistently across the list pages, in the same place (top of the page, above the table).

Page	Search matches	Filters available
Motorbikes	Name, brand, model, plate code, or plate province	Status (Available / Rented / Maintenance / Inactive)
Bookings	Customer name, phone, or booking number	Status; date range; motorbike; payment status
Customers	Name or phone	—
Reservations (table view)	Same as Bookings	Same as Bookings, plus sortable columns

Search boxes filter as you type (after a short pause), so there is no separate "Search" button to click. Clear the search box or reset the filter dropdown to see the full list again.

11 Reports & Export

Purpose: the Reports page turns the raw booking and customer data into business-level numbers, for a date range you choose.

The Reports page

Selecting a date range

Use the quick buttons (Today, Last 7 days, Last 30 days, This month, This year) or pick exact From/To dates, then click Apply.

What the report shows

- Revenue & Financials — total revenue, subtotal, discounts given, and extra charges, plus a revenue-over-time chart and a breakdown by payment status (Unpaid / Partial / Paid).
- Bookings & Rentals — total bookings, average rental length, cancellation rate, amount paid to date, and a breakdown by booking status.
- Motorbike Performance — a table of every motorbike with its bookings, revenue, utilization percentage, and maintenance cost for the period.
- Customers — new vs. returning customers, a ranked list of top customers by spend, and a breakdown by nationality.

Exporting data

Three CSV export buttons are available at the top of the page: Bookings / Revenue, Motorbikes, and Customers. Clicking one downloads a CSV file for the currently selected date range, which opens directly in Excel or Google Sheets.

i CSV is currently the only export format. There is no PDF export or print-formatted report inside the application; the CSV file can be opened and printed from a spreadsheet program if a printed copy is needed. There is also no data import feature — all records are entered through the forms described in this guide.

12 Settings (Content & Policies)

Purpose: control everything about how the public website looks and behaves, organized into tabs.

The screenshot shows the 'Content & Policies' settings page. The left sidebar contains navigation links for Admin, Dashboard, Rental Management (Motorbikes, Reservations, Bookings, Customers, Maintenance, Reports), Website (Content & Policies, Banners, FAQ, Locations, Messages), and Settings (Users, Audit Logs). The main content area has tabs for Business Info, Social Media, Homepage, About, Payment Methods, and Rental Policy. The 'Business Info' tab is active, showing fields for Business Name (Angkor Wheels Rental), Currency (USD), Phone (+855 93 949 149), Email (hello@angkorwheels.com), Address (Sivatha Boulevard, Siem Reap, Cambodia), Description (Siem Reap's trusted local motorbike rental service for tourists and residents alike.), and Footer Text (Angkor Wheels Rental — your local motorbike partner in Siem Reap.). A checkbox for 'Send email notifications' is checked. A 'Save Settings' button is at the bottom.

Business Info settings

Tab	What it controls
Business Info	Business name, currency, phone, email, address, description, footer text, and whether email notifications are sent (see below).
Social Media	Telegram, WhatsApp, Facebook, Instagram, and TikTok links shown on the site.
Homepage	The hero title, subtitle, and background image on the homepage.
About	The About page's title, description, story, mission, and image.
Payment Methods	Live KHQR account details (for an automatically generated QR code with the exact amount), plus instructions shown to customers for ABA, ACLEDA, Wing, and Card payments.

Tab	What it controls
Rental Policy	Minimum age, min/max rental days, required documents, and the policy text shown on the public Rental Policy page (deposit, fuel, late return, damage, cancellation, accident, traffic violation, and helmet policies), plus the late-fee-per-hour rate.

Admin / **Content & Policies**

Content & Policies

[Business Info](#) [Social Media](#) [Homepage](#) [About](#) [Payment Methods](#) [Rental Policy](#)

Payment Methods

Shown to customers on the booking form. There's no live payment gateway connected — customers declare what they paid (with an optional screenshot) and staff verify it against your own bank / KHQR dashboard before confirming a booking.

Live KHQR (recommended)

Enter your real Bakong account and every booking automatically gets its own KHQR code with the exact amount already filled in — no gateway account needed, works with any Cambodian banking app. Leave this blank to fall back to a static QR image below.

Bakong Account ID: yourname@bank Merchant / Account Name: Angkor Wheels Rental City: Siem Reap

Fallback KHQR Image URL (used only if no Bakong account above): https://.../khqr.png

KHQR Instructions: Scan with any Cambodian banking app to pay instantly.

ABA Instructions: Transfer to ABA account 000 111 222 (ANGKOR WHEELS RENTAL)

ACLEDA Instructions:

Wing Instructions:

Credit / Debit Card Instructions: We'll contact you with a secure card payment link

Save Settings

Payment Methods settings, including the Live KHQR configuration

Every tab is saved with the same Save Settings button; changes apply to the public website immediately.

Email notifications

When enabled, the system automatically emails a confirmation to the customer when a booking is created, a status-update email whenever the booking's status changes, and an alert to the business email address for every new booking. Sending email requires an SMTP mail server to be configured by whoever manages the server — if none is configured, these emails are simply skipped rather than causing an error.

13 Website Content: Banners, FAQ, Locations, Messages

These four menu items, under the Website group, manage smaller pieces of public website content.

Banners

The screenshot shows the 'Admin / Banners' page. On the left is a dark sidebar with a menu. The 'Banners' item is highlighted. The main content area has a header 'Admin / Banners Banners' and a user profile 'Admin'. Below the header is a form titled 'Add Banner' with fields for Title *, Subtitle, Image URL *, Button text, Button URL (e.g. /motorbikes), and two date pickers (mm/dd/yyyy). There is also a display order field with the value '1' and an 'Active' checkbox which is checked. An 'Add Banner' button is at the bottom of the form. To the right of the form is a preview of a banner with a landscape image, the text 'Angkor Angkor', and edit/delete icons.

Add FAQ

Do I need a driving license to rent a motorbike?

An international driving permit or a valid motorbike license from your home country is recommended. For scooters under 125cc, many renters do not require a license, but we strongly recommend having valid documentation for your own safety and insurance coverage.

Do you provide helmets?

Yes — every rental includes one free helmet. Additional helmets are available on request at no extra cost, subject to availability.

Can I rent a motorbike for one month?

Absolutely. We offer discounted monthly rates on most models — just select your dates on the motorbike page and the monthly price will apply automatically for rentals of 30 days or more.

Can you deliver the motorbike to my hotel?

Yes, we offer hotel delivery and pickup throughout Siem Reap town for a small delivery fee, which varies by location and is shown at checkout.

What happens if the motorbike breaks down?

Call or message us on Telegram/WhatsApp immediately. We provide roadside support and will arrange a replacement motorbike or repair as quickly as possible at no extra cost, provided the issue was not caused by misuse.

Is a deposit required?

A refundable deposit is required for most motorbikes, shown on each motorbike's detail page. This is returned in full when the motorbike is returned in its original condition.

The FAQ list

Question-and-answer pairs shown on the public FAQ page, with a display order and an active/inactive toggle.

Siem Reap City Center Sivatha Blvd, Siem Reap, Cambodia	 
Siem Reap International Airport National Road 6, Siem Reap, Cambodia	 
Pub Street Area Pub Street, Old Market, Siem Reap, Cambodia	 
Hotel Delivery Delivered to any hotel within Siem Reap town	 

The locations list

Pickup/return locations offered to customers, each with an address, description, Google Maps link, phone number, and opening/closing hours.

Messages

Messages submitted through the public Contact page

Messages submitted through the public Contact page arrive here. Each can be marked as read/unread so the team can track which inquiries still need a reply.

14 User Roles & Permissions

Purpose: the Users page (Settings group) manages who can log in to the admin panel and what they are allowed to do. Only a Super Admin can access this page.

Name	Email	Role	Status
Admin	admin@angkorwheels.com	Super Admin	<button>Deactivate</button>

The Users page — add a new admin/staff account

The three roles

Role	Description
Super Admin	Full access to everything, including creating other admin/staff accounts and changing roles.
Admin	Full access to running the business — motorbikes, bookings, customers, settings, reports — except managing user accounts.
Staff	Day-to-day front-desk work: create and edit bookings, edit customer details, manage maintenance records, and view everything else. Cannot add/edit/delete motorbikes, change settings, delete bookings, or manage users.

Permission matrix

Action	Super Admin	Admin	Staff
View dashboard, bookings, motorbikes, customers, reports	Yes	Yes	Yes
Create / edit bookings	Yes	Yes	Yes
Delete bookings	Yes	Yes	No
Edit customer details	Yes	Yes	Yes
Create maintenance records	Yes	Yes	Yes
Add / edit / delete motorbikes	Yes	Yes	No
Change settings, banners, FAQ, locations	Yes	Yes	No
Manage admin/staff users	Yes	No	No

Creating a user

1. Go to Settings → Users.
2. Fill in the new user's full name, email, and a password (minimum 8 characters).
3. Choose their role — Staff, Admin, or Super Admin.
4. Click Create User.

An existing user's role can be changed at any time from the dropdown next to their name, and their account can be deactivated (blocking login without deleting their history) using the Deactivate button.

15 Profile / Account

Your account menu, in the top-right of every admin page, shows your name and role.

The account menu

From here you can:

- See your current role (Super Admin, Admin, or Staff).
- Log out of the admin panel.

i There is currently no self-service "edit my profile" or "change my password while logged in" page. To change a password, use "Forgot password?" on the login screen (Section 3) to receive a reset link by email. A Super Admin can also update your name, email, or role from the Users page.

16 Common Errors & Troubleshooting

Problem	Possible Cause	Solution
Cannot log in	Incorrect email or password, or the account has been deactivated	Double-check your email and password. If it still fails, ask a Super Admin to confirm your account is active.
"At least \$X (50%) must be paid" when saving a booking	The booking is being set to a status other than Pending/Cancelled without enough of the deposit recorded	Increase the Paid Amount to at least 50% of the total, or leave the status as Pending until payment is confirmed.
"Motorbike is already reserved..." error	The chosen motorbike already has an overlapping booking for those dates	Pick different dates, choose a different motorbike, or check the Reservations calendar for that bike's availability.
A motorbike doesn't appear for customers to book	Its status is set to Maintenance or Inactive	Open the motorbike and change its status to Available once it is ready to rent again.
No data shows in a list	A search term or filter is still applied from a previous visit	Clear the search box and reset any status/date filters.
Booking confirmation emails are not arriving	No SMTP mail server has been configured, or email notifications are turned off	Ask whoever manages the server to configure SMTP settings, and check that "Send email notifications" is enabled under Settings → Business Info.
Can't delete a motorbike or booking	Your account role is Staff	Ask an Admin or Super Admin to perform the deletion.

17 Frequently Asked Questions

Can a customer book directly from the website?

Yes. Customers browse motorbikes, choose dates, enter their details, choose a payment method, and submit the request. It arrives in the admin panel as a Pending booking for staff to review and confirm.

Does the system accept real online payments automatically?

Payments are not processed automatically by a payment gateway. For KHQR, the system generates a real, ready-to-scan QR code with the exact amount filled in. For ABA, ACLEDA, Wing, and Card, the customer is shown payment instructions and can upload a screenshot as proof; staff then confirm the payment manually in the booking.

What happens if a customer returns the motorbike late?

If a late-fee-per-hour rate is configured (Settings → Rental Policy), the system automatically suggests a late fee when the booking is marked Returned, based on how many hours late it was. Staff can adjust this amount before saving.

Can the same motorbike be booked twice for overlapping dates?

No. The system checks for date overlaps every time a booking is created or edited, for both website and staff-created bookings, and blocks the save with an error if there is a conflict.

Is the public website available in Khmer?

Yes. Customers can switch between English and Khmer using the language switcher in the site header. The admin panel itself is English-only.

Can I get a printed copy of a report?

Export the report as a CSV file and open/print it from Excel or Google Sheets — there is no built-in "print report" button inside the application.

18 Support

For questions about using this system, contact the business using the details configured under Settings → Business Info:

- Phone: +855 93 949 149
- Email: hello@angkorwheels.com
- Telegram and WhatsApp: available from the contact icons on the public website

i These contact details are the business's own configured information, editable at any time from Settings → Business Info and Social Media.
